

### **Engineering Workshop:**

Workshop practice imparts basic knowledge of various tools and their uses in different sections of manufacturing such as Fitting, Tin Smithy, House Wiring, Carpentry, Plumbing and Machine shop etc. It is true, that engineers are not going to become carpenters or skilled workers on the shop floor, but by exposing themselves to all working trades, they get a bird's eye view of the basic practical activities associated with all sections of manufacturing. It helps to understand the activities and practical difficulties in a manufacturing process.
