

Engineering Metrology and Measurements Lab:

The metrology laboratory has been set up with the aim of catering the needs of researchers and industry. With this aim the laboratory is being upgraded every year with the state of the art equipment's. This lab is designed to update practicing engineers from industry, faculty and students from our college in the latest developments in metrology. The lab is useful in learning the standards and calibration procedures of basic instruments and to evaluate the measurement capabilities of gauges using different study methods.
