

INDUSTRIAL TRAINING FOR FACULTY

ORGANIZED BY DEPARTMENT OF COMPUTER SCIENCE AND ENGINEERING

ACADEMIC YEAR: 2025-26

The Department of Computer Science and Engineering organized an Industrial Training Program for Faculties on 10th October 2025 at Sri Vensy Pvt. Ltd., Tirupati. The objective of this program was to enhance the faculty's knowledge in Artificial Intelligence (AI) and Data Science and to explore real-world applications of AI-driven software development.

During the session, the industrial experts from Sri Vensy Pvt. Ltd. explained the core AI technologies, data science workflows, and the integration of machine learning models in modern software systems. The training included demonstrations and discussions on how AI solutions are designed, implemented, and optimized in industry projects.

The program helped faculty members gain practical exposure to industrial practices and understand how AI techniques are applied to solve real-time problems. It also emphasized the importance of continuous learning to align academic teaching with current industry trends.

This training provided an excellent platform for faculty to bridge the gap between academia and industry, enriching their teaching methodologies and enabling them to guide students effectively in future AI and data science projects.

The Department expresses its sincere gratitude to Sri Vensy Pvt. Ltd. for their support and for providing valuable insights that contributed to the professional growth of the participants.
