

Industrial Visit Report: Srini Food Park - On - 05/02/2026

An industrial visit to Srini Food Park was organized as part of the MBA curriculum to provide students with practical exposure to the functioning of the food processing industry. The main objective of the visit was to understand the application of management concepts in a real industrial environment.

Srini Food Park is engaged in food processing and packaging activities and plays an important role in value addition to agricultural products. At the beginning of the visit, company officials provided an overview of the organization, its background, product range, and operational structure. This introduction helped students understand the importance of food parks in supporting farmers, improving supply chain efficiency, and promoting industrial growth.

The visit included a guided tour of the production unit, where students observed various stages of operations such as raw material procurement, processing, packaging, and storage. Emphasis was given to hygiene practices, quality control procedures, and food safety standards followed by the organization. The use of machinery and technology to improve productivity and minimize wastage was also explained.

From a management perspective, the visit offered insights into operations management, inventory control, supply chain management, and workforce coordination. Students learned how proper planning and coordination among departments contribute to smooth production and timely delivery. Basic aspects of employee safety and work discipline were also discussed.

An interactive session was conducted at the end of the visit, allowing students to clarify their doubts and gain a better understanding of the challenges faced by the food processing industry.

In conclusion, the industrial visit to Srini Food Park was a valuable learning experience that enhanced the practical knowledge of MBA students and strengthened their understanding of industrial and managerial practices.
