Chairman of BOS, ECE presented the R25 M.Tech VLSI-SD Course structure and syllabus of I Semester. It is approved by the BoS members.

The following suggestions are given by the experts which may be included:

1. R25 – M.Tech Credits

The experts have recommended verifying the total credits for the R25 M.Tech program. They suggested ensuring that students are able to earn a total of 80 credits at the end of their course. This suggestion may also be considered for further evaluation and possible implementation across other M.Tech programs offered by the institution.

2. NPTEL Courses

As per the regulation, students can prefer NPTEL course for completing their open elective course. The BoS members recommended that students be encouraged to select NPTEL Postgraduate (PG) level courses (Level 7 or above) to strengthen their expertise in their chosen specialization areas and to gain deeper domain-specific knowledge aligned with their verticals.

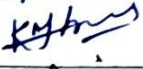

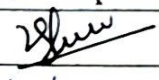

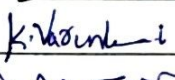

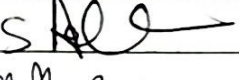

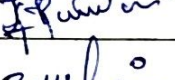

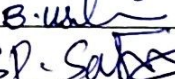

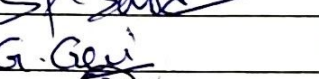

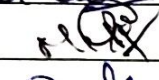

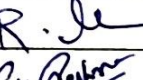

3. Recommendation of Verilog

The Board of Studies (BoS) members discussed the importance of incorporating Verilog programming in the curriculum to align with current industry practices and requirements. The members suggested that students should be provided an opportunity to learn Verilog either through a theory course or a laboratory component, as Verilog is widely used in the VLSI and semiconductor industries.

The above recommendations were presented for approval and were accepted by the Board members. Furthermore, the members authorized the BoS Chairman to make appropriate future modifications as necessary to uphold and enhance academic standards.

Attendance of the 10th BoS meeting held on 28.10.2025:
